SPIRAL STEEL SPRING UNDER BEDS.

CUT SHOWING INSIDE OF ROYAL REVERSIBLE DOUBLE SPRING BORDER.

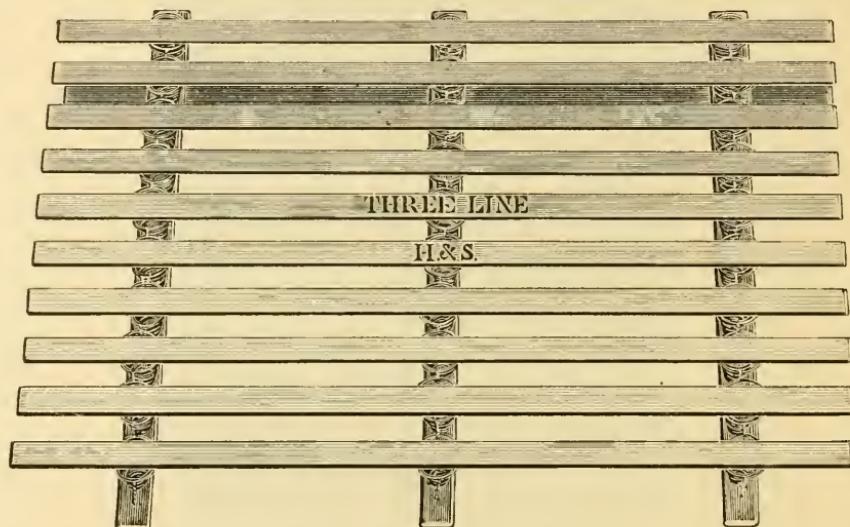

Patented, July 24th, 1877.

The Royal Reversible is made with a strong central frame with braced corners, over which webbing is stretched, lengthways and crossways, in the squares formed by the webbing an eyelet and burr is securely fastened, through which our patent spring is coiled so that the central bend, or bearing loop is secured at the centre, which makes the only permanent fastening without the aid of strings or straps; corded four times lengthways, crossways, and diagonally, after which rattan is securely fastened to springs on each side. Covered with burlaps upholstered in tow, and entirely enclosed in best ticking. In this bed we use 72 patent 15 coil steel springs and 8 corner springs, we claim this to be the best bed in the world, without exception—and it is so acknowledged by the trade. The Royal Reversible received over all other competitors the only medal of excellence awarded in the Industrial Exposition, New York, 1878 and 1879.
